

[Releases](#)[Usage](#)[FAQ](#)

Usage Guidelines

This usage guidelines cover how you should use my songs if you want to use them in your contents. To ensure you won't have any problems when using my songs, please read them carefully:

Forbidden usage:

It is in all cases forbidden to use my songs for the following purposes:

- Use for purposes against laws, public orders and morals
- Religious and political use
- Use to hate and/or offend me or other people

Usage in social media:

You are allowed to use my music in your contents on any of the social media platforms, such as YouTube, Twitch, etc. without having any copyright strikes or claims. Whether it be background songs, promotion, intros, etc. you won't need to ask me for permission. Crediting me is optional, but very appreciated.

I also kindly request that you pay enough attention to editing and put your own unique spin on any of my music videos if you plan on reuploading them, whether it's adding your commentary or visuals, etc. Simple reuploading them without any editing is forbidden!

Also keep in mind that all of my songs (that are managed by me) do NOT use Content IDs. If you spot any copyright claims in any of my songs you use in your contents, please report them immediately!

Usage in games:

You are allowed to use my music in any games such as osu!, Beat Saber, Geometry Dash, Audiosurf, etc. In certain commercial games, such as Project Arrhythmia, Geometry Dash, etc., you may need to check their "verification list" for copyright reasons. If that's the case, please contact me and the developers associated with these games, so I could get in their list and you contacting me can be used as an evidence.

If you are a game developer yourself and want to use my tunes, you can go ahead, tho I'd recommend contacting me.

Usage of remixes and collabs:

If you want to use any of the songs where I collaborated with another artist, you have my permission, but you also have to obtain permission from the artist associated with the release as well. Depending on who's managing the release, the collab songs may be subject to Content ID claims.

If you want to use any of my remixes, you have to obtain the permission from the original artists. You have my permission as well, but I cannot guarantee the approval of the original artists behind the remixed songs. Same goes to my songs that have been remixed by another artist - you have to obtain permission from the remixer as well! Their contacts can be found in their social media profiles.

If you are a musical artist yourself and would like to remix my song, you have my full permission. Some of my newer releases have stems that are free to download (currently in my Discord server only) so it's easier for you to get started. To avoid me missing your beautiful remix, contact me in any possible platforms!

Additionally, if you'd like to officially release your remix, please contact me! (Alternatively, fill in [this form](#))

Any other uses:

If you'd like to use my songs for anything other than those mentioned, please contact me via email!

Updated: 09/30/2023 - If you have any questions regarding the usage guidelines, you can contact me by Discord (layreboi) or Email (hello@layre.moe).

NOTICE: These guidelines only apply to older release, published before 2025. Releases in 2025 and newer follow the [new layre.moe music license](#).
